Clean Fuels Ohio's 2007 Buyer's Guide Now Available

COLUMBUS, OH – The highly anticipated 2007 Clean Fuels Ohio Buyer's Guide is now available. The Buyer's Guide is designed to help consumers interested in fuel-efficient as well as alternative fuel vehicles with their purchase. The 2007 Buyer's Guide debuted at the Columbus Auto Dealers Association's 2007 Auto Show in March. Included in the guide will be information on flexible-fuel (E85-ethanol capable), biodiesel, compressed natural gas (CNG), propane, and hybrid electric vehicles.

"We are excited about the additions to this year's Buyer's Guide," said Executive Director of Clean Fuels Ohio Sam Spofforth. "The 2007 guide has an attractive new look and added emissions ratings that will assist consumers in choosing cleaner vehicles based on their individual needs."

Just as in the 2006 Buyer's Guide, the 2007 edition features EPA fuel economy estimations, engine specifications, warranty information, and retail price for each vehicle in the guide. New to the 2007 edition is a 5-star emissions rating taken from EPA estimates that are based on the amount of health-damaging and smog-forming exhaust emitted by each vehicle. A one-star rating will indicate vehicles with the highest emissions while a five-star rating denotes a vehicle with close to zero emissions.

Print versions of the guide will be available at Clean Fuels Ohio events including trade shows, seminars, and other events throughout the state as well as at the Clean Fuels Ohio office. The guide will also be made available in electronic versions on the web at <http://www.CleanFuelsOhio.org/BuyersGuide>. To obtain a hard copy, please contact Clean Fuels Ohio at info@cleanfuelsohio.org or call the office at (614) 292-5443.
